### Being a jungle explorer by Emily Green

I'd love to be a jungle explorer because I love nature. I love seeing beautiful plants and amazing animals, such as orang-utans and frogs. There are thousands of different species of plants and animals in the jungle. I think it would be amazing to explore the jungle and find new species which nobody has ever seen before.

Jungle explorers do different things. For example, some jungle explorers are archaeologists. They look for lost cities and villages in the jungle. They find places where people lived hundreds of years ago. They study the places to find out how people lived in the past. Other jungle explorers are environmentalists. They look at how plants and animals live in the jungle. They study different species to see where they came from and how they survive. Some jungle explorers are scientists. They study the plants and flowers in the jungle and they find out how we can use these different plants. For instance, some plants can be used to make medicines.

Being in the jungle is an incredible experience. There is so much to see and do and there are lots of amazing things waiting to be discovered. Being a jungle explorer would be a wonderful job, because you could find something fantastic, like a lost city, a new species or a plant which might make a new medicine. I think it would be really interesting to discover something that could change the world. That's why I'd love to be a jungle explorer!

Read the tourist information leaflet.

### Visit The Great Wall Of China!

There are many different sections of the wall that you can visit. The following information is for the Badaling section of the wall.

	Opening times	Prices (¥)
Summer	6.30a.m. – 7p.m.	40 Yuan
Winter	7a.m. – 6p.m.	45 Yuan

#### Where is it?

The Badaling section of the wall is 70 kilometres away from Beijing, the capital city of China. The journey takes one hour from Beijing by bus or car.

#### What is The Great Wall of China?

The Great Wall of China is the largest and longest wall in the world. It is about 8,850 kilometres long. It is made of bricks, stone and earth. It is thought that several huge walls were built in the 5th century B.C. Later, in 221 B.C., the walls were connected to make one long wall to protect China. Then the Great Wall was rebuilt and extended over the next 2,000 years.

The wall which visitors can see today was built in the 15th century. Historians think that the wall was once guarded by more than one million men. Today, you can still see some of the towers which the men used to send messages along the wall and all across the country.

#### Why visit?

The Great Wall of China is an incredible sight. There are many different sections of the wall, so you can visit one section or all of the sections. The Badaling section is the closest to Beijing. The Badaling section of the Great Wall is 7.8 metres high and 5 metres wide. It has a museum and a theatre, so visitors can learn about the history of the Great Wall. It is amazing to walk along a section of the wall and see the wall stretch across the land as far as you can see. When you stand on the wall, you can imagine thousands of years of history and the millions of people that built it!

**Visit the Great Wall of China soon and experience a fantastic part of China's history.**
